-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 April 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 9-16 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 9-16 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Receipt of terminal disclaimer, amendment and remarks all dated 4-6-05 is acknowledged.

Claims 9-16 are pending.

The following rejection of record has been maintained:

Claims 1-16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-34 of U.S. Patent No. 6,645,611.

RESPONSE: Applicants have not presented any arguments regarding the double patenting rejection over U.S. Patent No. 6,645,611 and hence the rejection has been maintained.

The following is a new rejection:

Claim Rejections - 35 USC § 102

Claims 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,532,937 to Miller.

Miller discloses a sebum collecting means from the skin of a subject, wherein the means comprises an open-celled, microporous, hydrophobic polymeric film substrate for application to the skin (col. 2, lines 57-65 & col. 3, L 34-48). The microporous film of Miller is made of a nonwoven material such as a polyester, polyolefin etc., that have the capacity to absorb sebum (col. 3, L 51-68) and have a pore volume of 25% to 50% (within the range cited in claim 11) and a thickness of 0.01 mm to 0.05 mm (within the range cited in claim 11) (col. 4, lines 1-14). Miller discloses that the film is opaque or translucent before absorption and turns more translucent or transparent upon absorbing

Art Unit: 1615

sebum (col. 4, L 1-14 and col.5, L 1-13). While Miller does not specify the void volume of the pores as claimed, the porous film disclosed by Miller has a pore size and film thickness in the same range as that claimed and accordingly, the claimed void volume and interstitial volume (a function of film thickness and void volume) is inherent to the film of Miller. Accordingly, instant claims are anticipated by Miller.

Claim Rejections - 35 USC § 103

Claims 12-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 4,532,937 to Miller in view of GB in view of GB 2061709 (submitted on PTO-1449).

Instant claims recite a liquid absorbing substance partially distributed on the surface of the porous stretched film. Miller does teach distribution of a liquid absorbing substance on the oil and fat absorbing stretched, porous film material.

GB teaches a cosmetic pad for cleaning the skin or removing make-up, comprising a core of flexible, liquid –sorbent material and a covering of a stretched material on the liquid-sorbent material (abstract, page 1, lines 30-40). GB teaches a method of cleaning skin or face or make-up, comprising applying water to the pad to cause the liquid-sorbent material to absorb water and wiping the said pad over a portion of the surface to be removed or cleaned. GB teaches that the sorbent material is covered with a stretched plastic material, where as instant claim recites that is distributed on the surface of the pad. However, GB teaches the liquid-sorbent material i.e., for cleaning or removing make-up and thus has the same function as that of the instant. Accordingly, it would have been obvious for one of an ordinary skill in the art at

Art Unit: 1615

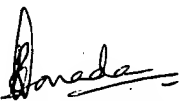

the time of the instant invention to choose to incorporate the sorbent material of GB into the porous film material or over the film of Miller because GB suggests that upon applying water a portion of the liquid sorbent material absorbs water and expels the material that cleanses the skin or the surface being cleaned. Therefore, a skilled artisan would have expected to remove sebum from the skin surface by the absorbing capacity of the microporous film (Miller) and also cleanse the skin from dirt or remove the make-up at the same time from the skin surface.

Art Unit: 1615

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lakshmi S Channavajjala whose telephone number is 571-272-0591. The examiner can normally be reached on 9.00 AM -6.30 PM Monday-Friday, except alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman K Page can be reached on 571-272-0602. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
